The OSI Models and their Vulnerabilities

7. Application Layer

Provides services to users (HTTP, FTP, SMTP)

Vulnerabilities: SQL Injection, Cross-Site Scripting (XSS), Malware

6. Presentation Layer

Data encryption and formatting

Vulnerabilities: Weak encryption, SSL/TLS attacks

5. Session Layer

Manages communication sessions

Vulnerabilities: Session hijacking, session fixation

4. Transport Layer

Reliable data delivery (TCP/UDP)

Vulnerabilities: SYN Flood, Port Scanning

3. Network Layer

Routing using IP addresses

Vulnerabilities: IP Spoofing, Routing attacks

2. Data Link Layer

Transfers data between devices on the same network

Vulnerabilities: MAC spoofing, ARP spoofing

1. Physical Layer

Transmission of bits through cables and hardware

Vulnerabilities: Cable cutting, hardware theft, electromagnetic interference
